

Product Safety

Safety Instruction

Before each use, check that the adapter is securely fitted and free from damage.

Use only as intended with portable air conditioners and compatible 150 mm exhaust hoses.

The adapter may increase airflow resistance in the exhaust system and thereby affect airflow. Before first use, check that the air conditioner is operating properly. Stop using the adapter immediately if error messages, unusual heat build-up, reduced airflow or unusual noises occur.

Do not modify, mechanically alter or misuse the product.

Replace damaged or deformed parts immediately.

Do not use the product near open flames or other sources of intense heat.

Avoid prolonged exposure to direct sunlight.

For indoor use only.

Keep out of reach of children. This product is not a toy.

Installation and use

Do not kink, crush or place the exhaust hose under tension.

Do not cover the air conditioner's ventilation openings.

The adapter must not restrict the exhaust-air cross-section beyond the limitations inherent in its design.

Use only with the original hose supplied by the air conditioner manufacturer and without extensions.

During operation, regularly check that the adapter is securely fitted and inspect it for deformation or unusual heat build-up.
