

Product Safety

Essential Oil Accessories

INTENDED USE

- For 3D-printed essential oil stands, bottle holders and modular organisers by PartAlarm. These products are intended for storing closed essential oil bottles and roll-on bottles indoors.
- Only use bottles that match the sizes and dimensions specified for the individual product. The accessories are not liquid containers; do not pour essential oils directly into them.

SAFETY INSTRUCTIONS

- Before each use, check for damage, deformation and stability. Stop using damaged parts.
- Place on a level, dry surface with sufficient load-bearing capacity. Keep away from table edges and secure against tipping or falling.
- Bottles must stand securely and be easy to insert and remove without force. Do not force bottles into openings that are too small.
- Keep bottles closed. Remove spilled oil immediately, as it may damage the plastic or the surface underneath. Stop using the accessory if cracks, softening or other material changes occur.
- Keep away from open flames, hot surfaces and strong heat sources. Avoid prolonged exposure to direct sunlight.
- Not a toy. Keep away from young children and pets. Small modules and accessory parts may be swallowed.
- Follow the safety instructions provided by the respective oil manufacturer. These accessories do not make essential oils childproof.

SETUP & USE

- Before adding bottles, fully insert modular components into the intended base, ensuring a proper fit. Check that they sit securely.
- Distribute bottles evenly and do not overload. Do not stack unless the individual product is expressly designed for stacking.
- Remove all bottles before moving or transporting the product. Do not modify, drill into or force components together.

CLEANING & CARE

- Clean with a soft, slightly damp cloth and mild washing-up liquid if needed. Allow to dry completely afterwards.
- Do not use solvents, aggressive cleaners or abrasive products. Do not clean in a dishwasher or sterilise with hot or boiling water.
